"THE VOICE OF THE STUDENTS - - BY THE STUDENTS"

Vol. 7 No. 6 | PURDUE UNIVERSITY CALUMET CENTER, HAMMOND, INDIANA | Friday, March 11, 1960

STUDENTS PLAN FOR CENTER DAY

Will Have Chance To See Counselors At Main Campus

The Purdue University campus is presenting a "Purdue Extension Day" on Saturday, March 12, 1960, for all extension students who would like to talk with campus advisors or who would like to learn more about the Purdue University campus. All extension students have been invited to attend this all day session which begins with registration at 9:00 a.m. and ends with a banquet at 6:00 p.m. A cost of $2.00 per student provides for a lunch in the residence halls and a banquet with a speaker and entertainment in the evening.

The registration at 9:00 a.m. is to organize the students and direct them to their interviews with their school advisors at 10:00 a.m. The interviews will be on a group basis with a short talk and then a period for questions from the students.

At noon lunch will be served in the residence halls and the students will be taken on tours. The girls will go to one of the women's residence halls and the fellows will go to one of the "H" halls.

At 1:30 p.m. there will be a four for all students who wish to see the library and Memorial Center, atomic reactors, and cyclotron.

From 3:30 p.m. to 5:30 p.m. there will be free time for students and the Office of Student Services will provide free passes for the Co-Rec Gym.

The banquet and entertainment will last from 6:00-8:00 p.m. and this concludes Center Day.

If there are any students who wish to stay overnight rather than come right home the men can stay in one of the residence halls for $1.00 a night (linens provided) or the Memorial Union. The women can stay at the Memorial Union also. The cost of a room at the Union averages about $3.00 a night.

The complete schedule is as follows:

9:00-10:00 Registration—Registration Desk Purdue Memorial Union.

10:00-12:00 Interviews with School Advisors.

12:15-1:00 Lunch — Residence Halls.

1:30-3:30 Tours—Hall of Music, Atomic Reactor, Library, Memorial Center, Cyclotron, and Horticulture.

3:30-5:30 Free time — Participation Passes provided for Co-Rec Gym.

6:00-8:00 Banquet—Speaker—Entertainment.

Dance of Feb. 13th

The dance following the girls basketball game, and Joliet game Saturday, February 14, was a rousing success for those who attended. Music was provided by a juke box, and even the members of the basketball team demonstrated some of their fabulous footwork. Who would have suspected that our team can dance as well as they play basketball, especially with each other! B. T. and R. W. make the C-U-T-E-S-T couple!

Coach Hayes and Mr. Surface chaperoned, and everyone had a good time.

CHEERLEADERS Jan Galen, Shari Stack, Judy Cavanaugh with Boilermaker Pete at Pep Rally before Joliet game.

Science Fair

The time is fast approaching for the Third Calumet Regional Science Fair to invade the thinking of everyone in the Calumet Region, for the Science Fair this year will be held on April 22, 23, and 24. Again as in the two previous years, the Science Fair will be held in the Purdue University Calumet Center lounge and the National Guard Armory.

Anyone who is a part of the Calumet Region, which is made up of Lake County and those parts of Illinois, which together with Lake County, which comprise what is known as the Calumet Region, and is enrolled in an elementary school or in a high school may enter. This year the officials of the Calumet Regional Science Fair are expecting over 350 entries.

Those students who enter the Science Fair have a keen desire to find out more about the field of Science through experimentation or by collecting data and drawing some conclusion. There are several categories that the student may enter, and these categories cover the possible fields of interest that any student may have. The categories include astronomy, biology, botany, chemistry, electronics, geography, geology, mathematics, physics, general science, zoology, and a few others.

The competition, to be fair, is classed according to grade levels; there are three divisions as follows: elementary, grades 1-6; junior, grades 7-8 or 9; and senior, grades 9 or 10-12. Judging is done through these groups.

There are several points on which the projects are judged; of these several points originality counts the most with scientific thought, completeness and accuracy, skill in workmanship, clarity, and dramatic value following in the list.

The students who compete at the Regional Science Fair are shooting for a trip to the National Science Fair which is to be held in Indianapolis, Indiana, in May this year. The two best exhibits from grades 10-12 win the all expense paid trip to the National Science Fair. There are many other prizes to vie for in the Fair. Among these awards is the Navy Cruise Award which is awarded to the best boys' exhibit in grades 10 and 11. This trip includes a week in New York or California in September.

The Grolier Publishing Society awards a thirty volume encyclopedia set of Popular Science books; the New American Library of World Literature also awards two fifty volume sets of science books. To those students whose exhibits are among the best medals will be awarded.

HAVE YOU ANY TRAFFIC?

A few weeks ago, a radiogram was sent to the Indiana University Radio Club in Bloomington from the radio club here at the center. It read: "Purdue University Calumet Center Radio Club would like to correspond. If interested, please indicate by return radiogram. What is your call?" In four days, a radiogram was received from station K9UAN in Bloomington. This is the call of their club station. The message read: "Would be happy to correspond with you. Do you want to arrange a schedule?" Signature—Jim; K9LHC, President of I. U. Radio Club.

These messages are handled by amateur radio operators exclusively. Traffic is the term applied to the messages and an operator is "carrying traffic" if he has messages to relay.

There is an organized setup for handling such traffic. Traffic nets are scheduled times for many operators to meet together on the air. If one operator has a message for New York, for instance, he will give the message to an operator in the net who has a better opportunity of pushing it toward New York. Organized nets, under various names, exist over the entire United States. A message may go through many nets before it reaches its destination.

No fee may be put on this service. Under Federal Communications Commission's laws, no charge must be made. Still, the service carries on, for the operators get more enjoyment out of their hobby when it is useful. And, because of the organized nets, the messages move fast.

The Radio Club will soon be in local nets and will handle traffic for the center to any part of the United States. There are operators in school now who can handle traffic through two local nets; the Calumet Area Emergency Net, and the Indiana Phone Net. If you would like to try the service, talk to any Radio Club member.

Report On Activity Fee

HISTORICAL BACKGROUND
By Bob Moore

The first formal proposal that there be an activity fee at the Calumet Center was made in 1954 by the Student Affairs Committee. At this time it was recommended that full-time students (those carrying 12 or more semester hours) be assesed $2.00, and part-time students (those carrying less than 12 hours) be assessed $1.00. This fee was specifically to exclude industrial classes such as those sponsored by Inland Steel Company. The expenditures involving the use of the funds derived from the student activity fee were to be controlled by the Student Affairs Committee within the limits imposed by the business and accounting procedures at Purdue University. The allocation of the fee under this proposal was to be as follows:

Activity	Percentage		Percentage	
Newspaper	20%	$ .40	20%	$ .40
Assembly and Lecture	30%	.60	25%	.50
Student Senate				
General Dance	5%	.10	10%	.20
General Picnic	5%	.10	10%	.20
Music (Records)	5%	.10	5%	.10
Equipment	5%	.10	5%	.10
Orientation Program	5%	.10	5%	.10
Athletic Program	25%	.50	20%	.40
		$2.00		$2.00

The action was taken by the faculty in the 1953-1954 school year and the proposal was sent to the campus in the summer of 1954.

In 1957 there was a second proposal made to the campus that a student activity be instituted at the Calumet Center, but, since it is the same as the 1954 proposal with the exception of a few minor points, there is little point in analyzing it.

REVIEW OF LITERATURE

In the main the literature used in the formation of this report was in the form of office memos and other reports between various segments of the school administration.

PURPOSE OF ACTIVITY FEE

By the institution of the activity fee, the Calumet Center hopes to provide the students wiht extra-curricular activities in keeping with the policies of Purdue University. The funds derived from the fee will be used for the activities which will benefit the majority of the student body.

It is the desire of the center to help the student to achieve a more mature outlook on life, and also to enhance the university atmosphere of the Calumet Center through the proper use of the fee.

ORGANIZATION AND ADMINISTRATION

The activities that meet the requirements previously stated in this report are as follows:

1. The Calumet Boilermaker
2. The Student Council
3. The Athletic Department
4. The Lecture Commitee

The above activities are all of a broad and service nature. The activities serve the student body in one manner or another but do not duplicate each other's function to any great extent; therefore, giving the student his just value from the activity fee, the activities have been approved by the director of the center and the Student Affairs Committee.

Any and all new student organizations wishing to have funds from the activity fee must present a petition to the Student Affairs Committe in writing. Upon presentation of the petition, the Student Affairs Commitee will discuss and vote on the request for funds. If the request passes the Student Affairs Committee by the requried simple majority, it will be referred to the Director of the center for final action.

All members of the Student Affairs Commitee, in so far as the student organizations receiving funds from the activity fee are concerned, have the responsibility of submitting detailed requests for appropriations. These requests for funds must be submitted before the second week in May preceding the school year for which the funds are being requested. The organizations using funds acquired from the activity fee are required to keep records to substantiate future requests for funds and to give the officers a solid footing on which to base their arguments.

The Student Affairs Committee has full authority to add, delete, and give blanket approval of rejection any requests for funds. After the Student Affairs Committee has made a full study of the reques it will report to the Director of the center who has like authority.

APPROPRIATION OF MONEY

In the event that the amount collected at the beginning of the semester is appreciably above or below the amount anticipated when

(Continued on Page 4)

Tackett Makes TV Debut

Mr. William Marshall Tackett, Director of Admissions at Purdue University Calumet Center, was guest speaker on Channel 11, WTTW television, on February 2, for the program "College Days."

The show was arranged by the TV department at Lafayette under the direction of Mr. Harlem White, Director of Admissions.

Mr. Tackett began his talk with the location of the various extensions of Purdue University. Purdue has centers in Michigan City, Fort Wayne, Indianapolis, and Hammond. 3,000 students are enrolled at P. U. C. C.

He then gave a detailed description of PUCC campus, which consists of 167 acres, and the proposed buildings to be completed in the near future. He also explained the requirements for the 17 various areas of training here. Courses for a degree are offered in Engineering, Science, Education, Humanities, Home Economics, Agriculture, Veterinary Medicine, Pharmacy, Industrial Management, and Appleid Technology.

Mr. Tackett pointed out the types of students attending Purdue. The school is co-educational, with a cosmopolitan student body of high quality—53% of the freshman class were in the top ⅓ of their graduation class.

PUCC offers two years of graduate work plus two years in undergraduate work in applied technology. PUCC also has a wide range of subject material for its adult education program, such as cultural and vocational, industrial, practical nursing, and medical technician.

THOUGHTS HERE AND THERE

The recent student-faculty meeting in Room 111 produced a healthy exchange of opinion. Even members of the audience were inspired to debate among themselves, and for a day or two after the meeting discussions were still going on in the cafeteria and in Room 5. We hope future panels will be scheduled. Though credit must go to many people, it is Mr. Raymond Tucker who, in coordinating the program, deserves our first thanks.

* * * *

As always, two factions continue another debate here. One contends that, from the point of view of total enrollment, student activity at the Center is poor. The other faction has it that since PUCC has no dormitories, since the Calumet-area communities provide entertainment and recreation in plenty, etc., the interest shown in extracurricular activities is little short of amazing. Another way of looking at it, says the latter group, is that since most students here have important non-student commitments (that is, the student is holding a job or is married or must work at home) it is very surprising that activities at the Center go as well as they do.

It might be instructive simply to ask the student members of committees what commitments they do have. After some thought, a student might produce a breakdown thus: Class time (per week)—18 hours; study time—28 hours; part-time job—10 hours; and, normally last in order of importance, extracurricular activities—"whenever I have time."

Of course it is to the credit of a college that it should maintain a healthy extracurricular program. Such a program not only has a definite place in the plans of the administration, but has this place precisely because well-run activities can give the student a sense of importance as a "member," perhaps of the activity itself and certainly of a school which takes a well-rounded view of his needs.

It is the opinion of most at the Center that we have in operation here a vital and important extracurricular program. The people who devote their time to making the Center a more and more significant focus of activity should know that their work does not go unappreciated, that it is carefully observed and deeply valued.

". . . you blocks, you stones, you worse than senseless things . . ."

We know this is a very well-worn subject around here, but what the devil do you guys want? You keep the lounge like a pig's sty with all your garbage strewn all over. It's no wonder the cockroaches have taken to the Casino—even they can't stand living in all that filth, so you know where that leaves you. You play cards among the filth of it all, just as though you were at your local pool hall. You want we should get a table, too? You say, "So what's the matter with playin' cards?" We'll tell you. Nothing, or everything, depending on the occasion and also depending on what's happening around you. You guys certainly don't act like you've had much to do with normal people—you're so intent upon your clubs, spades, diamonds and hearts (we're not sure about the hearts, but we'd sure like to use the clubs) that you don't even know when you're being spoken to. We'd sure like to know how your parents get through to you—hacksaws and drills maybe? You blockheads certainly remain in a rested position at all times—even when a girl enters the lounge and ends up sitting on the chandeliers—that's when you monkeys aren't improving your manly status by playing Tarzan.

As we were told recently, "Practice makes perfect," and if you don't change soon we're sure you'll jointly win the World's Championship title of **"Slobs, First Class!"**

We'd personally like to wish you luck in all your endeavors.

You can be sure we won't try to have another pep session. Our team is so good, you know, that the players don't need any of that thing called school spirit to help them win. You probably heard that we lost to Joliet by a measly one point. Just four more male voices could have done wonders for our volume and the outcome of the game. We all know, of course, that no matter what goes on around here, you dopes can be counted on to come through—come through like water through a sieve (in dribbles). That's the way most drips come.

There's one thing we still can't understand—we can't understand why the girls don't like the lounge!!!

Active Students

P.S.: Of course, it goes without saying that this letter is not directed to the gentlemen in the group; rather, you should be congratulated. We wonder how you've managed to retain your manners in such an adverse atmosphere.

Help! Help!

Dear Editor,

Cockroaches are invading the casino, and something just has to be done about it!

The first invader was found crawling around on Aldona's coat and what a commotion that caused. The others have been scattering the girls by playing in the middle of the floor and chinning themselves on the arms of the furniture.

If we weren't afraid of them we'd try to get rid of them ourselves but we are scared so, please, somebody, HELP! (Anyway they crunch when we step on them, and we usually miss.)

Thank you,
The Girls in the Casino

Dear Girls:

I am afraid that you have come to the wrong place in your plea for help, since the actual source of the cockroaches is evidently an overflow from the lounge. (And you all know what a tremendous success your clean-up campaign was!!!)

Editor

Pep Session

Now that our **Final** pep session has taken place, what do you guys out in the lounge think? Aren't you pleased? I have heard it said that the cheerleaders should be more active. Well, I think Friday, February 12, was the answer to your many queries. The girls had a rousing pep session planned, but it seems you boys were more interested in your pinochle games than the assembly planned for you. During the **Purdue Fight Song**, the last cheer of the day, there was more talking than singing. In fact, many of the fellows didn't even have the common courtesy to rise for the school anthem—not even after they were requested to do so. Perhaps I shouldn't harp on this age-old subject of the apathy of PUCC students, but after that pep session I can't help taking this stand.

Since the girls had planned an exhibition game before the PUCC-Joliet game on Saturday, Roberta (Bob) Moore, Ronita (Ron) Housbach, and Roberta (Bob) Yargus acted as cheerleaders in the pep session. These boys interpreted a cheer quite different from the way the girls do it. The female cheerleaders then performed a cheer with the support of the rest of the girls from PUCC. A Joliet rival, captured by Boilermaker Pete, was brought forward and hanged in effigy.

Attention, Beatniks

Get with it, man. O-o-o-h-h, it's the limit (sigh-groan). You're out of it, if you're a homebody on twenty and six days after the beginning of the third (sigh). That box making with the sound; m-m-m that rhyme without reason. I'll send you (sigh-groan). M-m-o-o-v-v. Pamper your whiskers and get your sandals. Like GO, go, go.

What he's trying to say is come and join the rest of the beatniks of P.U.C.C. and I.U. Extension in the Lounge on Saturday, March 26, from 811:30 P.M. Stag or drag, it's 50 cents per person. Don't miss the beat generation activities. Put your best beatnik clothes on and express yourself. Like GO, go.

P. M. O. NEWS

The P. M. O. is planning a trip to the Purdue campus on March 12th for center day. The choral group will appear with the Fort Wayne P. M. O. at the banquet to present a few selections from **My Fair Lady** and may also sing with the Purdue Varsity Glee Club.

Anyone interested in attending the center day activities should contact Bob Moore, in Room 5, by March 5th.

Remember, new P. M. O. members are always welcome.

Learning and Using Language Imperative For Study Abroad

If you plan to study abroad, learn the language of the country you are going to; then live and study in the new language and leave English behind. If you do not, you will miss knowing the people and their culture, and much of the enjoyment and true value of studying outside the United States will pass you by.

This is the consensus of 65 American college juniors, graduates, and teachers, members of the Scandinavian Seminar, who met recently at Tranberg, Gjovik, Norway, to add up and report results of their first five months in Denmark, Finland, Norway, and Sweden.

For the second year in a row, members of the Scandinavian Seminar gathered together to send some word of guidance back to the United States to help college students now deciding about a year of study abroad. Summed up, they say "GO," but with this emphasis: Pick a program that gets you into the language quickly and is then designed to bring you into continuous, close contact with the people and the forces that shape their daily lives and give them their color and character.

These American students speak with some authority. Under the Seminar plan, students accepted into the program begin the study of the new language, with language records supplied by the Seminar, three to five months before leaving the U. S. On arrival in Scandinavia, language learning is accelerated by a series of week-long courses given by Seminar faculty, which alternate with two family stays of three to four weeks each. Language learning develops partly by formal instruction and partly the "natural" way . . . by living it.

Within two months after arrival in Scandinavia, Seminar students are ready for enrollment in one of the famous Scandinavian **folkehojskoler**, residential adult schools. Here, separated from other Americans, the Seminar member takes courses in the humanities and social sciences, lives with a Scandinavian roommate, and participates in the life of the school. After New Year's, the American student is able to initiate an independent study project in a field of special interest which may involve field trips to other institutions and meeting authorities in the subject matter area.

What do you get out of all this?

"The unbelievable thrill of communicating in a new language."
"The amazement of realizing how much a language reveals about a strange people and their culture."
"A perspective on the United States and life at home I could not possibly have gotten any other way."
"An understanding of a new country and culture and therefore a chance to look at our own from a new standpoint."

These comments barely scratch the surface of what this academic year abroad is meaning to the students in the Scandinavian Seminar and what they think it will mean for others who study overseas: not only the chance to know another country well, but in doing so to have a chance to learn something about yourself and what it takes for people with different backgrounds and values to live together in harmony.

The Scandinavian Seminar will welcome inquiries about its program. Some vacancies are open for the 1960-61 program. Those eligible include college juniors, graduates, and any now in professional work who seek such special experience. Closing date for the 1960-61 program is April 1. For details, write: Scandinavian Seminar, 127A East 73 St., New York 21, N. Y.

Girl's Basketball Game

On February 13th at 6:30 p.m. the PUCC girls played a basketball game at the armory. The team captains were Helen "Cookie" Chapin and Judi Cavanaugh. Cookie's team wore fuscia pennies and Judi's team wore Bermuda stockings. Helen Chapin's team won 18-11. High scorers of the game were Jackie Bruno and Marlene Mayersich. Mrs. Chelich, the physical education teacher, was the referee.

Those on Judi Cavanaugh's team were Jackie Bruno, Grace Liesenfelt. Theresa Kulasa, Julie Porter, and Sharon Stack. Those on Helen Chapin's team were Gloria Stimak, Bonnie Haney, Eva Ebel, Barbara Kussy, and Marlene Mayersich.

Broken fingernails, bruised hips, and one disjointed finger were the physical results of the Girls' Basketball game on February 13th.

Only a total of 29 points was accumulated during the game, but the laughs the audience enjoyed were innumerable. The antics the girls displayed literally had the audience and referee in stitches. Fouls were numerous, but half of them weren't called.

Although the game did have its rougher moments (GIRLS CAN BE VICIOUS) the players never once forgot their manners. When one girl knocked her opponent's glasses off she stopped, picked them up, put them on the other girl, apologized and continued to play.

When two of the girls collided and fell on their derrieres they laughed so hard that they couldn't get up and were fouled for delay of the game.

Everyone at the game had a wonderful time. The basketball players were so tired from laughing and so sore from playing that they just groaned, smiled and said, "Wait till next year!"

The Night Crawler

by RAY NILLES

Here we are again with a new semester and another edition of news and views for and from the "sleepy crew," the night students.

As a new semester begins, take a look around you. Do you see quite a few people who seem to be pretty tired looking? These are all new members of our evening study group who have just transferred from day school! There seems to be quite a few of them this spring.

Note to I. D. W. P. C. (I despise Wally Pehlen Club) members: Your hero has not; repeat, has **not** transferred to the Lafayette campus this semester. He can still be found wandering around the halls of the center. Rumor is going around that he has a whole batch of new jokes, so be on the lookout.

Does anyone care for more classes? Right now there are several special eight week classes being conducted at the center. At midterm, several more will begin including: Psychology of Children; Poetry for Today; and Parliamentary Procedure. For more information stop in at the main office most any evening.

Night students may consider themselves lucky. They don't have to look at the Lounge in its daytime state. Most of us get here after good old George has finished swceping it. It looks 100% better at 11 p.m. than it does at noon.

The former editor of the **Boilermaker** has resigned the position to take up her studies in night school. Good luck to Bernardine Baum, and her successor, Helen Chapin.

If anyone has any news or items of interest to Night Crawlers, write it down and leave it in Room 5.

Welcome back to all of the old "Night Crawlers," and welcome to all of the new ones.

See you next month.

Overheard In the Halls . . .

by A. DAGO

Professor I. Flunkem: "Boy, oh boy, did I ever have a rough time grading those last themes. I could not find enough errors to lower everybody's grades to the usual level for my class. I had to give 2 A's and three B's. The rest were below C."

Professor U. Tryanpass: "You think you had it rough. The first hourly I gave, no one passed. I sure must have riled them because I had 2 students who usually worked and I had to give them C's on the next."

Professor B. Scatter: "Remember the day I was grading those final papers without my pencil? Well, I finally got them graded and had them stacked according to grades. The top 3 papers were A's, the next 4 B's, the next 6 were C's, the next 12 were D's and the other five were F's. Anyway, when I was walking down the stairs with the papers, I slipped and they flew every which way. Far be it from me to regrade any papers. I simply gave all the papers that landed on the top stair A's and so on down the line and stairs. I ended up with one A, two B's, 3 C's and the rest F's.

Just then a student shot himself in the arm with his bow and arrow.

Students Advised To Submit SSCQT Applications Now

Applications for the April 28, 1960 administration of the College Qualification Test are now available at Selective Service System local boards throughout the country.

Eligible students who intend to take this test should apply at once to the nearest Selective Service local board for an application and a bulletin of information.

Following instructions in the bulletin, the student should fill out his application and mail it immediately in the envelope provided to SELECTIVE SERVICE EXAMINING SECTION, Educational Testing Service, P. O. Box 586, Princeton, New Jersey. Applications for the April 28 test must be postmarked no later than midnight, April 7, 1960.

According to Educational Testing Service, which prepares and administers the College Qualification Test for the Selective Service System, it will be greatly to the student's advantage to file his application at once. The results will be reported to the student's Selective Service local board of jurisdiction for use in considering his deferment as a student.

Bunny Returns From Editorship

The whip that cracked over the staff working on this issue of the **Boilermaker** had a different sound to it. That's because our editor of last semester, Miss Bernardine Ann Baum, better known to almost everyone as Bunny, has retired from the sport.

Bunny took over the editorship with the November issue last year and has held it ever since, doing a very fine job. She has worked on the **Boilermaker** staff since the fall of 1957.

Bunny came to Purdue in 1957 after serving three years with the Women's Marine Corps. At Purdue, Bunny is studying veterinary medicine. She was born and raised in East Chicago, and was graduated from Bishop Noll High School.

From her course of study, you might guess that Bunny likes animals. Well, you are right. She has several pets, including: Two dogs, with pups; parakeets, with eggs; and uncountable tropical fish. Her dogs scared the devil out of several people who entered Room 5 the other day. She housed them in the newspaper office temporarily while she registered for her night class. The "dogsitter" for the day was her successor as whip cracker (Editor) of the **Boilermaker,** Cookie Chapin.

At this time, the **Boilermaker** staff would like to congratulate Bunny on the fine job that she has done and wish her luck. We hope to see her often at night school this spring.

—Boilermaker Pete

SINK IT, Wiggins, sink it!!

DOUG REPORTS ON RADIO CLUB

We are finally an official club, and just in time, for many activities are already under way.

The first order of business at our first business meeting, February 22, was the election of officers and selection of station trustee. The offices of President, Vice President, and Treasurer were filled by Charlie Hanusin, K9GSV; Howard Smith, KN9VGI; and Bob Moore, respectively. Charlie is one of the most active radio operators in this area and is a net control operator for the Calumet Area Emergency Net which handles radiograms. Bob Moore, with whom you are familiar for his work in Student Council, is soon to become a licensed amateur. Your Radio Club reporter, Doug Bastian, K9OSJ, is trustee of the station. The office of Secretary will be filled at a later date.

Our club is adding a new phase to the outstanding character of P.U.C.C. The amateur station soon to be operating here will give a voice to this center which will be heard far and wide.

The station will provide useful services for the students here. Radoigram service will be established first. Radiograms are comparable to telegrams but are free and handled solely by amateur radio stations. Other services, such as phone-patching, will be announced and explained later.

It is not a difficult task to obtain an amateur license. And one thing that is second nature to all hams is helping others to join them in their hobby. The members of our club are no exception. In fact, an original purpose of Radio Club is to help those interested in amateur radio.

Is there a place in the club for people who are not particularly interested in obtaining an amateur license? Definitely, there is. A license isn't necessary for one to speak on an amateur station. Nor is one necessary for short-wave listening on the club's equipment. Actually, the only activity requiring a license is the controlling of a transmitter.

As you can see, the range of interests is wide. Possibly, many of you aren't aware of what you're missing. For this reason, we urge you to come and sit in on a meeting. At present, the meetings are being held every Monday at twelve noon. The place is announced on the bulletin board. It might be interesting to note that the dues for non-licensed members are lower than those for operators.

The Radio Club is growing rapidly. Be sure to see the report on station progress in the Boilermaker next month.

Question of the Month

Do you think girls should take advantage of Leap Year?

Bill Houk—Heavens yes!

Gil Spisak—Personally, I hope not.

Leo Pratore—It's OK with me.

Ed Niemiec—Just don't jump too high!

Al Puzas—They have to!

Tom Blastic—Yes, they better before it's too late.

Ron Battafoco—If it's necessary.

Stan Selva—It depends on the girl.

James Ehrlich — Right off-hand I'd say yes.

Larry Clayton—Sure! I'm available.

"Sam" Martain—Ask me and find out!

Anonymous—If they got out of the Casino, they might not have to!!

BOILERMAKER CAGE

PUCC won their sixth game of the season on December 10th by defeating Elgin J. C. by a score of 62-52. Big Bob Tolan led the Boilermakers with 14 points. Tom Koscho chipped in with 10 points. The highlight of PUCC's offense was a balanced attack.

	B	FT	PF	TP
Rayson	3	2	2	8
Smith	4	1	4	9
Tolan	7	0	4	14
Quigg	0	1	0	1
Abbott	3	0	0	6
Rimkunas	1	0	4	2
Rimkunas	1	0	4	2
Clark	0	1	0	1
Koscho	4	2	3	10
Champion	1	0	1	2
Paunovich	0	0	2	0

On December 15th PUCC traveled to Morton J. C. and lost a thrilling overtime contest by a score of 65-64. PUCC played without the services of their 6'-7" starting center Bob Tolan. PUCC's attack was led by Larry Drutis with 18 points. He was backed by Koscho and Rayson with 12 and 11 points respectively.

NOT QUITE

	B	FT	PF	TP
Rayson	5	1	4	11
Smith	4	0	5	8
Rimkunas	2	3	5	7
Abbott	2	4	2	8
Koscho	6	0	5	12
Drutis	5	8	3	18
Thompson	0	0	0	0
Champion	0	0	5	0
Clark	0	0	1	0

The PUCC cagers went on a scoring spree against the Kendall Vikings on December 17th. PUCC scored 57 points in the first half and 49 in the second half to run up a score of 106. The final 106-43 was the result of big scores by PUCC's Bill Smith and John Rimkunas with 26 points apiece.

ZOWIE!!

	B	FT	PF	TP
Rayson	3	2	4	8
Smith	11	4	3	26
Rimkunas	11	4	3	26
Koscho	4	0	3	8
Quigg	7	0	1	14
Drutis	5	0	0	10
Clark	3	0	3	6
Champion	4	0	4	8

PUCC lost a heartbreaker to Crane J. C. on January 6th by a score of 75-72. The Boilermakers led 37-32 at the half, but due to hot second-half shooting of Bryant, the boys fell behind. Bryant wound up with a total of 38 points. Our top scorers were Tolan and Drutis with 23 and 20 points each.

NEW YEAR'S BLUES

	B	FT	PF	TP
Rayson	5	0	5	10
Smith	5	1	5	11
Tolan	10	3	3	23

Quigg	2	0	0	4
Tolan	9	0	3	18
Thompson	1	0	0	2
Paunovich	1	0	0	2
Champion	0	1	1	1

PUCC traveled to Evanston, Ill., on January 13th to meet the Kendall Vikings. PUCC again showed a balanced scoring attack led by "Ace" Drutis and "Scoop" Rayson and Smith with 19, 18 and 16 respectively. The final score was 78-39.

TWICE THEIR PRODUCT

	B	FT	PF	TP
Rayson	8	2	2	18
Smith	6	4	3	16
Tolan	4	1	4	9
Drutis	8	3	4	19
Clark	2	1	1	5
Abbott	0	3	0	3
Quigg	2	0	1	4
Champion	1	0	0	2
Koscho	1	0	0	2

On January 16th the Chicago University undefeated "B" team defeated our Boilermakers in the Chicago University Fieldhouse by a score of 48-40. Rimkunas led our scorers with 16 points.

THAT'S OK

	B	FT	PF	TP
Rayson	1	2	4	4
Smith	1	0	3	2
Rimkunas	6	4	2	16
Drutis	1	6	1	8
Clark	0	0	0	0
Abbott	0	0	1	0
Quigg	1	1	2	3
Tolan	1	5	5	7

PUCC got back on the winning track by defeating the number one team in the Illinois J. C. conference. We beat Thornton J. C. by a score of 77-64 on January 25th. Again we had a balanced scoring attack. A newcomer to the squad, 6'-6" Ron Wiggins played his first game and scored 11 points. High scorers for PUCC were Tolan, Quigg, Wiggins, and Rayson with 18, 18, 11, and 11 points respectively.

MORE .... MORE .... MORE .... MO WELCOME

	B	FT	PF	TP
Rayson	4	3	3	11
Smith	3	1	0	7
Rimkunas	4	0	4	8
Drutis	1	2	1	4
Quigg	8	2	0	18
Wiggins	5	1	2	11
Tolan	8	2	2	18

PUCC avenged an earlier overtime loss by completely outclassing Morton J. C. on the Boilermakers' home floor on February 3rd. Big Ron Wiggins led scoring with 19 points and John Rimkunas chipped in with 14.

V-VICTORY

	B	FT	PF	TP
Rayson	2	3	1	7
Smith	2	1	2	4
Rimkunas	6	2	2	14
Drutis	4	4	2	12
Quigg	3	4	2	10
Wiggins	8	4	4	20
Tolan	3	1	4	7
Champion	1	0	0	2
Paunovich	0	0	2	0
Thompson	0	0	1	0
Clark	2	0	3	4

On February 10th PUCC avenged an earlier loss by dumping previously unbeaten Chicago university "B" team by a score of 73-66. Tolan topped all scores with 20 points.

The Boilermakers weakened in the second half and lost to a fast Joliet J. C. team by a score of 82-81 on February 13th. Top scorers for Purdue were Tolan and Wiggins with 29 and 28 points.

PUCC traveled to Wright J. C. and lost a hard fought contest by a score of 85-75 on February 17th. High scorers for PUCC were Wiggins, Drutis, Rayson with 20, 19, and 12 points.

Can a man legally marry his widow's sister? (Use the State of Illinois.)

There is an apple tree with only five (5) apples on it. There are five horsemen riding along and each takes an apple. How many apples are left?

Carma Works With Profs

The first of a series of research projects which Dr. Raymond K. Tucker has conducted since joining the PUCC faculty in September of 1958 will be published next month in **The Speech Teacher,** one of the official organs of the Speech Association of America.

Entitled "Criticism in the Beginning Speech Course," the report reveals the findings of Professor Tucker and one of his friends, Dr. Austin J. Freeley, Director of Forensics, John Carroll University, Cleveland, Ohio. The research was conducted last year at ten American colleges and universities of various sizes using a questionnaire which the two researchers developed in an earlier preliminary study.

The report will reveal the attitudes of over 500 students when asked how they felt about the types of criticism they considered valuable in the basic speech course, when it should be given, whether it should be written or oral, by the instructor or by both class members and instructor, and similar items. The article is one of the first field studies ever made investigating long held theories in the field of speech education.

Carma Gregory Plays Role

A PUCC student, Carma Gregory, played a most important role in the study. Working with the research team, Miss Gregory took on the monumental task of analyzing the study—well over 4000 individual items. Miss Gregory expressed an interest in the study while she was acting as a subject. The research team offered Miss Gregory an hourly salary for her part in analyzing the data; she refused, however, preferring to do the work for whatever contribution to knowledge she might make. Of her work, Dr. Tucker remarked: "Never have I seen such thoroughness in analyzing questionnaires. Miss Gregory attacked the project with an accuracy and eye for detail that was nothing short of phenomenal. Dr. Freeley joins with me in expressing our thanks. Our hope is that the experience was sufficiently educational to warrant Miss Gregory's efforts and time."

Dr. Tucker and his research partner, Dr. Freeley are now tackling the problem from another angle: they want to know what speech teachers consider good speech criticism.

Intramural Basketball

The Globetrippers (6-0) moved closer to the championship on Feb. 18 as they defeated the Ticos (7-1) 32 to 29. Wally Ahgilbers led the scoring with 13 points. The Ticos defeated the Hamtrotters (5-1) on Jesse Hymes' last second basket 29 to 27. Providing they beat the Methol Group the Globetrippers can win the title Feb. 25 by beating the Hamtrotters.

In exhibition games Coach Bob Hayes' varsity defeated the Globetrippers twice 104-68 and 70-54. In the first game Rimkunas led the varsity with 24 points, followed by Wiggins with 18 and Drutis with 16. High scorers for the Globetrippers were Granger with 19 points, Robinson 12 and Edwards and Chrisalaky 7. In the second game Wiggins had 20 points, Rayson 15 and Drutis 13 for the varsity and for the Globetrippers Orr had 17 points followed by Evans 12, Atkinson and Chrisulaky 8 points. The Hamtrotters also tried their luck with the varsity but were routed 89-44.

Volleyball will start Feb. 29th and everybody will be trying to stop the What-Me-Worrys who now own a 27 game winning streak. The WMW should be as tough as ever because their 3 co-captains —Chas. Rayson, Bob Fuller and Larry Drutis—return from last year.

TOP 3 LEAGUE STANDING

	Won	Lost
Globetrippers	6	0
Ticos	7	1
Hamtrotters	5	1

A man is hunting in Africa. He has a pair of binoculars, a pair of tweezers, and a glass jar with a lid. He has lost his gun, but still manages to capture a herd of elephants. How did he do it? Submit your answer with your name to room 5.

Answers in next issue.

BASKETBALL . .

(Continued from Page 3)

can't remember ever having played in a more hard-fought contest. All of us were trying our utmost to win that ball game. In scrambling after loose balls, we picked up quite a few ugly splinters from the floor, but it was worth it when, with only twelve seconds to go, we tied the score at 55-55. However, little Maigonis Valomanis broke all of our hearts as he drove the entire length of the floor and scored—to make the final score read: Tbilisi 57, Chicago 55.

Another aspect of Russian basketball was the fact that our press forced the Soviets out of their pattern type of basketball. They were at a disadvantage as they did not seem to be able to adjust to new situations in the game as we did, apparently because they have not played or watched basketball as long. After we went into the press, for example, we gained control of the game and outscored the Georgians 36 to 24. This kind of disadvantage might hold true for the Russians in all sports. Although many people feel the Russians in general are more natural athletes than are the Americans, I do not feel that way. Americans are the natural athletes, playing, as they do, in all kinds of competitive sports from childhood onwards. However, very likely the Russians devote a lot more time and effort to each sport than we do.

Probably the most humorous part of the game involved the two Russian referees in the first half of the game. Running must be outlawed in the Russian code-of-conduct book for referees. The referee would call a play from the opposite end of the floor and never bat an eye. Worst of all, we couldn't argue with the officials since they couldn't understand us anyway, and if we stopped to question a call, the Russian players would dash to the opposite end of the court to score while we were talking, or trying to talk, to the referee.

However, in all fairness to the Russian referees and players, I feel they gave us a fine example of sportsmanship and "gamemanship."

PHYLLIS DICKS

You fellows who are more alert have probably seen the pretty five foot three inch, black haired, brown eyed gorgeous hunk of woman around school lately. This ideal model of the weaker sex was born to Mr. and Mrs. Victor Dicks on August 29, 1941, which would make her eighteen at present. Her parents named her Phyllis Ann, but her close friends call her Dixey.

Although Phyllis and her sister and parents live just outside of Griffith, she had to attend Dyer Central High School, where she was a cheerleader for three years, and graduated in the upper third of her class in '59. Phyllis was honored by giving the welcome speech at her graduation.

Miss Dicks came to work in Mr. Smith's office as a secretary when Gloria Postma, Mr. Smith's previous secretary, decided to leave. The Saturday before coming to Purdue Phyllis had had a tumor removed from the bottom of her left foot and was walking on four stitches causing her to limp. "Very embarrassing," she said.

When I asked her what she thought of PUCC she stated the following: "Purdue is a very interesting place to work. I meet many different people, all of whom seem very friendly and cordial."

Phyllis likes all sports and is a "Maverick" fan. She also likes "Matty's Funday Funnies" and agrees with Dr. Wilson's choice of "Huckleberry Hound." Her only dislike is Elvis and the girls who scream over him. Favorite movie star is Daron Migiven, favorite singers are Perry Como and Peggy Lee, and her favorite food is liver and onions. Her only ambition is to do good in whatever she tries to do.

When she gets married she wants to live on the Pacific coast and doesn't care how many children she has. Phyllis has a hard time remembering names, I know this is true because when I asked her her full name she had to stop and **think.**

When interviewing Miss Dicks I found out something which is very interesting. For many years Phyllis has had to wear glasses and has always disliked them, but about ten months ago she put on a pair of contact lenses and fell in love with them and has been wearing them ever since.

Phyllis is a very pleasant person to talk with, and I'm sure she'll make some fortunate man happy.

After telling you all there is to know about Phyllis, I can only say "hands off fellows" because she has been going steady for the past four years and is very satisfied, and serious, with her present beau.

—Wally McLaughlin
